

e-Framework Special Edition July 2009

The e-Framework for Education and Research is an [international initiative](#) that provides information to institutions on investing in and using information technology infrastructure. It advocates service-oriented approaches to facilitate technical interoperability of core infrastructure as well as effective use of available funding.

This newsletter will inform and update you about the e-Framework developments and related activities. If you no longer wish to receive this newsletter please log-in to the e-Framework [subscriber list](#) and unsubscribe.

The views expressed in papers and individual contributions are the views of the contributor and may not reflect the views of the e-Framework Partnership.

e-Framework Technical Model

e-Framework publishes technical model and begins validation process

Experience gained since the formation of the e-Framework Partnership has resulted in the articulation of an e-Framework Technical Model. The model aims to make the e-Framework's service-oriented approach to software design more comprehensive and more comprehensible. The technical model also illustrates how the different e-Framework documentary design artefacts relate to the design of systems. Access to the e-Framework Technical Model and related documents is located [here](#).

Your Feedback Is Needed!

The e-Framework Partnership is conducting a review of its work to date, and seeking to validate the service oriented approach we have developed. We are looking for feedback from those engaged in innovation activity, software development, and service delivery. Please visit the [e-Framework Technical Model page](#) to view the referenced documents and then submit your comments via the feedback box provided. We look forward to your contributions!

Get Involved

To keep up-to-date with e-Framework activities visit the [e-Framework community wiki](#).

To share your own experiences and let us know the topics that you would like us to explore, email Bas Cordewener: cordewener@surf.nl
